

**EFPR835**

# Calibr8

CLEAR LENS

DESIGNED  
TO PROTECT

**FORCE**  
360

## Features

- ▲ Certified medium impact rated protection to AS/NZS 1337.1:2010
- ▲ Diamond Tech Hardcoat is extremely scratch resistant and resists acid and solvent degradation
- ▲ Hydro Tech AF is a washable hydrophilic coating that prevents fog forming on the lens. A great coating for hot and humid conditions
- ▲ The FlexPro browguard curves and cushions the forehead. Airflow is maximised through its venting system
- ▲ 4-way adjustable side arms allow calibration to any face shape
- ▲ Flexbridge II offers finger like cushioning to the nose bridge assuring the most comfortable fit
- ▲ Premium non slip TPR is used to create Force360's Comfort Side Arms. This co-moulded feature reduces pressure and wearer fatigue
- ▲ Dielectric construction means no metal parts are used, ensuring they can be used in applications where static electricity is a hazard

## Standards & Certification

Force360 recognise that without product certification by a Notified Body all product performance testing, and adherence to standards claims cannot be independently verified.

If they are not as claimed, serious safety implications for the wearer, and legal implications for the supplier and even the employer may arise.

Force360 source their entire range of FPR eye protection from a single manufacturing partner to ensure consistency and reliability of product, but most importantly Force360 have taken the further step of engaging a globally recognised Notified Body to audit and certify both the manufacturing process and the products.

All of Force360's eye protection is certified to the latest AS/NZS eye protection standards.

## Specifications

<b>Part No.</b>	EFPR835
<b>Lens Colour</b>	Clear Lens
<b>VLT Rating</b>	92%
<b>Lens Shade Category</b>	0

## Packaging

1 12 144

## Alternative Lens Options

	<b>EFPR836</b> Smoke
	<b>EFPR837</b> Silver Mirror
	<b>EFPR838</b> Clear Mirror
	<b>EFPR839</b> Red Mirror
	<b>EFPR903</b> Polarised

## EFPR835

### Key Technologies

#### Medium Impact

Certified medium impact rated protection to AS/NZS 1337.1:2010.

#### Diamond Tech HardCoat

Force360 uses its own Diamond Tech Hardcoat on all FPR lenses. Diamond Tech Hardcoat is extremely scratch resistant and resists acid and solvent degradation as well as scratches from dusts and debris.

#### Hydro Tech AF

Force360 uses its HydroTech Anti Fog coating on most FPR safety lenses. HydroTech AF is a washable hydrophilic based coating providing an anti static finish that repels dusts and particles and prevents fog forming on the lens, the ideal coating for hot and humid conditions.

#### Flexpro Browguard

The FlexPro browguard curves and cushions the forehead. Airflow is maximised through its venting system.

#### 4-Way Adjustable Hinge

4-way adjustable side arms allow calibration to any face shape.

#### Dielectric Build

Dielectric construction means no metal parts are used, ensuring they can be used in applications where static electricity is a hazard.

#### Comfort Side Arms

Premium non slip TPR is used to create Force360's Comfort Side Arms. This co-moulded feature reduces pressure and wearer fatigue

#### Flexbridge II

Flexbridge II offers finger like cushioning to the nose bridge assuring the most comfortable fit

#### UV400

UV400 Polycarbonate lenses offer the wearer the best protection against UVA and UVB damaging rays. 100% protection is the standard across the entire Force360 FPR eyewear range.

### Radiation Guide

<b>UVA/UVB 280-380nm</b>	UV light rays from the sun are invisible to the eye yet can cause serious damage including corneal blistering, cataracts, premature aging, conjunctivitis and partial blindness
<b>Visible Light 380-780nm</b>	Intense visual bright light can cause retina damage and create visual perception issues
<b>Blue Light 380-500nm</b>	Blue light rays from the sun or artificial lighting like neons, cause eye strain and fatigue. Colours and definition can be adversely affected. In extreme cases blindness can occur
<b>Infra Red Light 780-1400nm</b>	Infra Red rays from the sun or mechanically heat generating applications like gas welding can cause eye dryness and corneal damage, macular degeneration and blindness
